

## JAVA

**Write a program for a Student details where u need to display the details as below:**

**Input: student name, subject name, mark**

**Output: student name, subject name, mark**

```
package operators;

import java.util.Scanner;

public class StudentDetails {

    public static void main(String[] args) {

        // TODO Auto-generated method stub

        Scanner sc = new Scanner(System .in);

        //input

        System.out.println("Enter student name : ");

        String studentName = sc.nextLine();

        System.out.println("Enter subject name :");

        String subjectName = sc .nextLine();

        System.out.println("Enter mark :");

        int mark = sc.nextInt();

        // Output

        System.out.println("Student Name: " + studentName);

        System.out.println("Subject Name: " + subjectName);

        System.out.println("Mark: " + mark);

        sc.close();
```

}

}

## **OUTPUT:**

Enter student name :

Maivizhi

Enter subject name :

Testing

Enter mark :

95

Student Name: Maivizhi

Subject Name: Testing

Mark: 95
