

JAVA

1. Write a program to print "Excellent" when the student mark is greater than 80, "Good" when the student mark is in between 61 to 80. Print "Average" when student mark is between 50 to 60.

```
package operators;

import java.util.Scanner;

public class Conditional {

    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        System.out.print("Enter student mark: ");
        int mark = sc.nextInt();

        if (mark > 80) {
            System.out.println("Excellent");
        } else if (mark >= 61 && mark <= 80) {
            System.out.println("Good");
        } else if (mark >= 50 && mark <= 60) {
            System.out.println("Average");
        } else {
            System.out.println("Needs Improvement");
        }

        sc.close();
    }
}
```

```
}
```

```
}
```

OUTPUT:

Enter student mark: 85

Excellent

Enter student mark: 76

Good

Enter student mark: 55

Average

2. Write a program to print only even numbers using for loop. The numbers are in between 1 to 20.

```
package operators;
```

```
public class EvenNumber {
```

```
    public static void main(String[] args) {
```

```
        // TODO Auto-generated method stub
```

```
        for(int i =1; i <= 20; i++)  
            if (i% 2==0)  
                System.out.println(i);  
    }  
  
}
```

OUTPUT:

2
4
6
8
10
12
14
16
18
20
